The **Company**

Solex Energy is South African company that specialises in the construction and operation of small to large solar infrastructure in South Africa and the region. We pride ourselves in fantastic service delivery, complete and extensive planning and consultation. PV (Photovoltaics) play a pivotal role in sustainable low cost and efficient energy supplies. Solex offers help to solar developers accessing this affordable, clean and sustainable energy.

Solex plans, constructs and operates solar plants across South Africa, with excellent practical knowledge of the solar industry, Solex realises profitable photovoltaic projects, offering services from project development to operation and maintenance.

We are increasingly active in the field of solar plant construction for rooftop mounted projects, ground mounted and tracking systems.

PV systems and solar farms are an investment which both the consumer and the environment benefit from. Each project promises a sustainable cost effective return for the consumer.

By promoting the installation of solar systems we are making a significant contribution to the national energy transition. This also has a positive effect on the future of energy. At Solex, being energy efficient and environmentally conscious is our number 1 priority. This attitude, paired with our construction success makes us attractive to clients.

Solex strongly believes in reliable and economic construction methodologies, achieved through our committed teams, we are incredibly service orientated solar experts, we believe in only the highest level of service and quality components.

Our **Services**

Industrial

Agricultural

Utility

Solar Energy currently provides important contribution to energy, this will increase rapidly in years to come. One of the most appealing factors of Solar Power is that no project is too big or too small. Solex can provide solar energy to individuals, agricultural, commercial and domestic properties. Our expertise in the solar industry will translate into the efficiency that will exceed our expectations. We understand the potential that the sun has to supply energy efficiently and effectively, we will provide the best possible support to you with any kind of photovoltaic project you envision.

Past & Current **Projects**

Our concept is to deliver all contracts timeously, to specification and to the client's satisfaction. Our accomplished experience in the Solar Construction Industry, has taught us that efficiency and proper engineering procedure have no substitute. Our record with the organizations on a consultative role will confirm that despite working under very unfavourable conditions, we managed to work our contracts to specification and its satisfaction.
